Objective

"To secure a challenging role as a Software Engineer in a reputed organization where I can utilize my skills in full-stack development, particularly in the MERN stack, to build scalable and user-friendly applications. I aim to contribute to impactful projects, continuously enhance my technical expertise, and grow as a professional while adding value to the organization."

Education

Lovely Professional University **Jalandhar, Punjab**
Bachelor of Technology in Computer Science and Engineering, CGPA: 7.98 *2027*
Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Artificial Intelligence, Computer Networks, Software Engineering

Sainik School Amaravathinagar **Coimbatore, TamilNadu**
High School Degree (e.g., Higher Secondary Certificate), Percentage: 78% *2023*
Key Subjects: Physics, Chemistry, Mathematics, Computer Science

Sainik School Amaravathinagar **Coimbatore, TamilNadu**
Secondary School Certificate, Percentage: 90% *2021*
Achievements: Awarded in Best in Sports and Games

Technical Skills

Programming Languages: Python, Java, C++
Tools/Technologies: Git, Docker, GitHub
Operating Systems: Linux, Windows
Databases: MySQL, MongoDB
Frameworks: React.js, Node.js, Express.js

Projects

Project Title: *AgroSustain – Full Stack Application*
Description: A role-based e-commerce and education platform for farmers where farmers can sell their products and also learn about the crops.
Technologies Used: HTML, Tailwind CSS, JavaScript, React, Node.js, Express, MongoDB, RESTful APIs.
Impact/Achievements: Implemented RESTful APIs and optimized MongoDB schemas, enabling efficient handling of user, product, and order data workflows.
Demo/Code Link: https://github.com/vivek-vk7/AgroSustain

Project Title: *Podcase Hosting and Listening Platform*
Description: Users can create, manage, and listen to podcasts with a smooth and user-friendly interface.
Technologies Used: HTML, CSS, JavaScript, MySQL, PHP
Impact/Achievements: Users can track and schedule their podcast.
Demo/Code Link: https://github.com/vivek-vk7/Podcast-hosting-and-listening-platform

Certifications (If Applicable)

Cloud Computing NPTEL: Gained foundational knowledge of cloud computing concepts including virtualization, cloud architecture, deployment models, and cloud services.

The Bits and Bytes of Computer Networking by Google: Learned fundamental computer networking concepts including TCP/IP, DNS, HTTP, routing and network troubleshooting.

Data Structure and Algorithms by CSE Pathshala: Completed Arrays, Linked List, Search and Sorting Algorithms, Heaps, Recursion, Trees concepts.

AI Recommendations for Improvement

Recommendation 1: Strengthen problem-solving skills by practicing Data Structures and Algorithms regularly on platforms like LeetCode and CodeChef to improve coding efficiency and interview readiness.

Recommendation 2: Enhance backend development skills by working on advanced concepts such as authentication (JWT), API security, and system design to build more robust and scalable applications.

Recommendation 3: Improve project quality by deploying applications using cloud platforms and adding features like real-time updates, performance optimization, and better UI/UX design.

Self-Assigned Tasks (Till 10th week of this semester)

Task 1: Solve atleast 100 more problems on LeetCode.

Task 2: Build and deploy one advanced MERN stack project.

Task 3: Learn and implement Docker and basic cloud deployment.

Targets Allocated (Till 10th week of this semester)

Targets Approved by Course Instructor

- Complete certification in [Certification Name].
- Enroll in and complete [Specific MOOC or course].
- Finish the project titled "[Project Name]" to strengthen your CV.
